

## Rhino Hand and Arm Protection

Rhino is the specialised range of protective gloves and sleeves engineered to provide extreme levels of cut resistance and thermal protection in the most hazardous and demanding industrial environments. Rhino materials are engineered to provide a step change in cut resistance when compared with established products manufactured from 100% para aramid.

TO VIEW DATASHEET PDFS FOR THESE PRODUCTS AS WELL AS OTHER USEFUL INFORMATION PLEASE LOGIN TO OUR MEDIA CENTRE AT THE BOTTOM OF THIS PAGE BY ENTERING YOUR USER NAME AND PASSWORD.

All gloves and sleeves in the Rhino range achieve a high level of (EN388) cut resistance, to find your additional requirements search the catagories below and click on the individual icons.
