

Xcalibur Cut Resistant Sweatshirt

An extension of the Rhino® Workwear Range, the Xcalibur® Cut Resistant Sweatshirt is an advanced garment designed for the glass industry to provide a lightweight, protective solution for high cut hazard applications.

An extension of the Rhino® Workwear Range, the Xcalibur® Cut Resistant Sweatshirt is an advanced garment designed for the glass industry to provide a lightweight, protective solution for high cut hazard applications.

Performing to the maximum EN388 cut level 5 it provides full body and arm protection. Developed using the latest in cutting-edge technology and manufacturing techniques, a seamless knitted construction ensures complete ease of movement for the wearer.

The soft and lightweight fabric has a 'cool to the touch' feel for superb user comfort, allowing for long periods of wear. Through specialist manufacturing, a further increase in comfort level is achieved by integrating underarm vents to enhance breathability, allowing sufficient cool air to circulate the body. The sweatshirt is easycare, machine washable at up to 60°C and can be tumble-dried, without impairment to the cut resistant properties.

Initial user trials have been very well received, as the garment offers a high level of protection with enhanced comfort and wearability at a very competitive price.

The sweatshirt is available in a dark grey knit for maximum serviceability and in sizes S- XXL (special sizes on request). An embroidered logo service is also available.

Typical applications would include raw glass handling, glass toughening and DGU manufacture.
